

JERIC RODRIGUEZ

SENIOR FULL STACK SOFTWARE ENGINEER

Professional Summary

Senior Full-Stack Software Engineer and Technical Lead with 10+ years of professional software engineering and web development experience designing, developing, modernizing, and supporting business-critical applications. Strong background in PHP/Laravel, Vue.js, JavaScript/TypeScript, Ruby on Rails, MySQL, and PostgreSQL, with hands-on experience across application architecture, API integrations, database design, legacy-system modernization, production deployments, and technical leadership. Experienced working directly with business stakeholders to translate operational requirements into maintainable software solutions and lead delivery from planning through production support.

PROFESSIONAL EXPERIENCE

Sr. Lead Full-Stack Developer, Corporate Keys Group, Australia

DEC 2021 — MAY 2026

- Led ongoing development and maintenance of business-critical booking, accommodation, payment, customer-management, and internal administration platforms.
- Designed and implemented backend functionality using PHP and MySQL while maintaining and modernizing legacy production systems.
- Guided developers through task planning, debugging, testing, deployment, and production support across multiple company platforms.
- Integrated third-party services and payment workflows and supported production infrastructure using Linux, SSH, Git, and cloud-hosted environments.
- Delivered major improvements to a multi-step booking workflow covering responsive UI, pricing and business rules, payment authorization, and production deployment.
- Worked directly with management to break down new initiatives into technical specifications, implementation tasks, and release plans.

Full-Stack Web Developer, Red Cedar Software

JUL 2019 — 2022

- Developed and maintained full-stack web applications using PHP/Laravel, JavaScript, Vue.js, and relational databases.
- Built customer-facing and internal workflows, APIs, database features, and production fixes across multiple client projects.
- Collaborated with distributed teams to deliver features, troubleshoot issues, and support production applications.

Web Developer Consultant, Norwegian Maritime Foundation of the Philippines Inc.

JUN 2019 — FEB 2021

- Continued development and consulting support for the organization's enrollment, certification, reporting, and administrative systems.
- Developed and maintained Ruby on Rails and PostgreSQL application functionality supporting training-center operations.
- Implemented document-generation, search, activity-tracking, data-processing, and administrative workflow improvements.
